

AL'S FIVE POINT PLAN

VISION FOR ARIZONA'S FUTURE: Arizona is blessed with world class weather and geography. As citizens of Arizona, together, we can make Arizona the number one state in the nation by taking care of the following critical areas, where the federal government has proven itself to be dysfunctional.

- (1) Secure the Border:** We can secure the border by enforcing existing and future laws, ending sanctuary cities and having all city and county law enforcement agencies back up and assist the US Border Patrol. With a secure border, Arizona taxpayers can save up to 2 billion dollars a year in related costs.
- (2) Improve K-12 Education:** We can vastly improve our K-12 education system by maximizing competition through parental school choice, so that children in all families, regardless of income, can go to the school of their choice.
- (3) Tax Relief for Individuals & Businesses:** We need the best tax environment of any state in the union, for individuals and businesses, to attract new jobs to Arizona and to have the most vibrant economy possible, through lower taxes.
- (4) Water Management:** We must continue to pursue conservation efforts and we need to look at desalination projects & agreements involving the Sea of Cortez and the Pacific Ocean.
- (5) Environment & Energy:** We must pursue alternative sources of clean energy including solar, thermal, wind and nuclear. We should be the first state in the union to build a nuclear power plant in over 30 years. Nothing is cleaner than nuclear power.
